### JOB EXPERIENCE

#### 98point6

Software Development Engineer Intern 05/23/2022 - 08/12/2022

- Significantly improved the user experience of the 98point6 patient app by implementing the app's banner which notifies users of app functionality issues, COVID-19 information, and other essential notifications
- Enhanced the developer experience by using Airbnb's Showkase to organize and visualize the 98point6 app's UI components in order to improve development time, experience and productivity

#### Duck Creek Technologies

Software Engineer Intern 12/08/2022 - 05/09/2023

- Significantly improved the user experience and interface of the Duck Creek website's compatibility widgets, which gave users more flexibility with how they interact with the Duck Creek platform
- As a member of the Platform maintenance team, I worked with other engineers and team members in an agile environment to improve and maintain the Duck Creek Insurance platform

#### Dalton State College

Mathematics Tutor 09/2018 - 05/2019

- Assisted students with their course work and enhanced their problem solving skills by utilizing a strategized method of teaching mathematical concepts and skills

### TECHNICAL SKILLS

**Languages:** Java, HTML/CSS, SQL/SQLite, XML, Javascript, Kotlin, C++, R

**Libraries and Frameworks:** Bootstrap, RIBs, Visuallkit, Showkase, Jetpack (Compose)

**Other:** Kotlin Multiplatform, Launchdarkly, Jenkins, Figma, Git/Github, Linux

### EDUCATION

University Of Richmond, Richmond, VA

Bachelor's of Science in Computer Science, Minor in Mathematics

Graduation Date: December 2023

### PROJECTS

**Mood Tracker** - <https://github.com/DMAIDOH/AndroidStudioProjects/tree/master/MoodTracker>

- An android application that lets a user create an account, log in and express and track their emotions
- My project partner and I built our app using Android Studio (XML, Java and the SQLite database)

**My Portfolio Website** - <https://github.com/DMAIDOH/Deborah-web-portfolio>

- An interactive website with a visually appealing user interface and solid user experience, this website allows me to display my passion and skill for web development while also providing access to useful information about myself as an aspiring developer.
- Built using HTML, CSS and Javascript

### COURSEWORK

Data Structures, Algorithms, Software Systems Development, Human Computer Interaction, Database Systems, Android Programming, Computer Security, Computer Organization and Architecture, Computational and Mathematical Modeling
